

SOLITERM SUPPORT TYPE SST-2 WITH CONTACTS BLOCK

DESCRIPTION

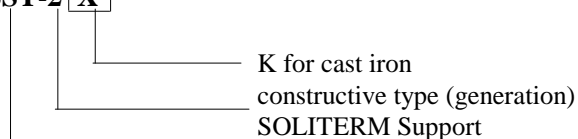

Support SOLITERM type SST-2 is a part of a measuring chain for quick determination of equivalent carbon in cast iron with the purpose upholding the analysis sensor, taking over and transmitting to the indicating instrument the signal from the thermocouple.

The product - Support SOLITERM is manufactured in a steady constructive variant which is able to ensure the stability of the ensemble, it has at superior part the contacts block fixed by threaded pin and at inferior part has a flange for mounting at the working table.

TECHNICAL DATA

- Dimensions : $\phi 160 \times 241 \times 290$ for SST-2K
 - The weight of SOLITERM Support without extension cable (type K): max. 3,8 kg
 - The weight of Contacts block type BC-ST-2K: max. 170 gr.
 - Using : SOLITERM Support: min. 3500 measurements
Contacts Block type BC-ST-2K : min 300 measurements
 - Protection : IP 00
- The length of the extension or compensation cable is supplied as requested of client.

Symbolising : SST-2 | X |

ORDERING

In the order must be mentioned :

- product denomination and the symbol
- length of the extension cable

*Ex.: Support for quick determination of equivalent carbon in cast iron :
“ SOLITERM Support type SST-2K with 10 m extension cable - 5 pieces “*

APPLICATION
